## HOUSING STARTS ARE UP IN JUNE

The seasonally adjusted annual rate of housing starts was 241,300 units in June, up 7.0 per cent from 225,500 units in May.

The seasonally adjusted annual rate of urban starts rose 8.3 per cent to 207,200 units in June, due mainly to an increase in multiple starts. Single starts remained constant at 98,400 units, while multiple starts rebounded to 108,800 units in June, up 17.0 per cent compared to May.

Compared to May, the seasonally adjusted annual rate of urban starts in June was up by 42.6 per cent to 96,700 units in Ontario and up 12.6 per cent to 39,300 units in Quebec, due largely to an increase in multiple unit starts. The increase in Ontario and Quebec was partially offset by a decrease in urban starts in the Atlantic, Prairie and BC regions.

## HAUSSE DES MISES EN CHANTIER D'HABITATIONS EN JUIN

Le nombre désaisonnalisé annualisé de mises en chantier d'habitations au Canada a augmenté de 7,0 % en juin par rapport à mai, passant de 225 500 à 241 300.

Le nombre désaisonnalisé annualisé de mises en chantier dans les centres urbains du Canada s'est établi à 207 200 en juin, progressant de 8,3 % en regard du mois de mai. Cet accroissement tient surtout à l'intensification de l'activité dans la catégorie des logements collectifs. En effet, le nombre désaisonnalisé annualisé de mises en chantier s'est élevé de 17,0 % dans le segment des collectifs et est demeuré le même dans les maisons individuelles, se chiffrant respectivement à 108 800 et 98 400.

De mai à juin, le nombre désaisonnalisé annualisé de mises en chantier en milieu urbain a atteint 96 700 en Ontario et 39 300 au Québec, ce qui représente des hausses respectives de 42,6 et 12,6 %. Ces dernières, attribuables en grande partie à une accélération de la production dans le segment des collectifs, ont été contrebalancées partiellement par les diminutions observées dans les provinces de l'Atlantique, dans la région des Prairies et en Colombie-Britannique.

* The SAAR is a monthly figure that is adjusted to remove normal seasonal variation and multiplied by 12 to reflect annual levels.

* DDA : Données mensuelles corrigées des variations saisonnières normales et exprimées sur une échelle annuelle en les multipliant par 12.

Rural starts in June were estimated at a seasonally adjusted annual rate of 34,100 units.

For the first half of 2005, actual urban starts were 5.2 per cent lower than in the same period in 2004. Year-to-date single starts decreased 7.8 per cent, and multiple starts dipped 2.5 per cent compared to the same period last year.

On évalue à 34 100 le nombre désaisonnalisé annualisé de mises en chantier dans les régions rurales du Canada pour le mois de juin.

En chiffres réels, le cumul annuel des mises en chantier d'habitations dans les centres urbains accuse un recul de 5,2 % par rapport à celui des six premiers mois de 2004. La baisse est de 7,8 % dans le segment des maisons individuelles et de 2,5 % dans celui des logements collectifs.

*Data on 2001 Census definitions. / Données fondées sur les définitions du recensement de 2001.

## HOUSING STARTS ARE UP IN JUNE

The seasonally adjusted annual rate of housing starts was 241,300 units in June, up 7.0 per cent from 225,500 units in May.

The seasonally adjusted annual rate of urban starts rose 8.3 per cent to 207,200 units in June, due mainly to an increase in multiple starts. Single starts remained constant at 98,400 units, while multiple starts rebounded to 108,800 units in June, up 17.0 per cent compared to May.

Compared to May, the seasonally adjusted annual rate of urban starts in June was up by 42.6 per cent to 96,700 units in Ontario and up 12.6 per cent to 39,300 units in Quebec, due largely to an increase in multiple unit starts. The increase in Ontario and Quebec was partially offset by a decrease in urban starts in the Atlantic, Prairie and BC regions.

* The SAAR is a monthly figure that is adjusted to remove normal seasonal variation and multiplied by 12 to reflect annual levels.

## HAUSSE DES MISES EN CHANTIER D'HABITATIONS EN JUIN

Le nombre désaisonnalisé annualisé de mises en chantier d'habitations au Canada a augmenté de 7,0 % en juin par rapport à mai, passant de 225 500 à 241 300.

Le nombre désaisonnalisé annualisé de mises en chantier dans les centres urbains du Canada s'est établi à 207 200 en juin, progressant de 8,3 % en regard du mois de mai. Cet accroissement tient surtout à l'intensification de l'activité dans la catégorie des logements collectifs. En effet, le nombre désaisonnalisé annualisé de mises en chantier s'est élevé de 17,0 % dans le segment des collectifs et est demeuré le même dans les maisons individuelles, se chiffrant respectivement à 108 800 et 98 400.

De mai à juin, le nombre désaisonnalisé annualisé de mises en chantier en milieu urbain a atteint 96 700 en Ontario et 39 300 au Québec, ce qui représente des hausses respectives de 42,6 et 12,6 %. Ces dernières, attribuables en grande partie à une accélération de la production dans le segment des collectifs, ont été contrebalancées partiellement par les diminutions observées dans les provinces de l'Atlantique, dans la région des Prairies et en Colombie-Britannique.

* DDA : Données mensuelles corrigées des variations saisonnières normales et exprimées sur une échelle annuelle en les multipliant par 12.

Rural starts in June were estimated at a seasonally adjusted annual rate of 34,100 units.

For the first half of 2005, actual urban starts were 5.2 per cent lower than in the same period in 2004. Year-to-date single starts decreased 7.8 per cent, and multiple starts dipped 2.5 per cent compared to the same period last year.

On évalue à 34 100 le nombre désaisonnalisé annualisé de mises en chantier dans les régions rurales du Canada pour le mois de juin.

En chiffres réels, le cumul annuel des mises en chantier d'habitations dans les centres urbains accuse un recul de 5,2 % par rapport à celui des six premiers mois de 2004. La baisse est de 7,8 % dans le segment des maisons individuelles et de 2,5 % dans celui des logements collectifs.
